Talenteck Internship – Summer 2019

This internship is for Barnard College/Columbia University students. The position is a good fit for undergraduate students in the Statistics, Mathematics or Economics department but strong students from any department are welcome to apply. The ideal candidate should have strong quantitative skills.

ABOUT TALENTECK

Talenteck is a boutique start-up in the fast-growing human capital analytics space. Our belief is that the next generation of HR technology is the intersection of analytics, data, cutting-edge statistical techniques (AI, machine learning, econometrics), labor theory, and business strategy. We are building Talenteck to introduce predictive intelligence as a partner in every single people decision a company makes.

Founded by Barnard College/Columbia University professor Lalith Munasinghe, our team is comprised primarily of his former students, coworkers, and co-authors. This creates a unique environment which combines top notch academic research with its real-world applications for today’s challenges in the workplace. We have client partners in diverse industries such as retail, software engineering, contact centers, manufacturing, and consulting.

For more information, please visit www.talenteck.com.

ABOUT THE POSITION

Responsibilities would include:

- Data analysis
- Predictive modeling
- Research
- Communication of results

This is a great position for a strong undergraduate student who wants to learn some data analytics in an applied, fast-paced environment. The ideal candidate would possess strong quantitative skills, with some course experience in Statistics/Econometrics/Probability, and some experience with R.

PRACTICAL CONSIDERATIONS

- The position is unpaid, but the intern is eligible to move to a paid position after they get up to speed

*** To apply, please send a copy of your resume and transcript, along with a brief introduction and a few sentences about why you are interested in this position to kate.gautier@talenteck.com ***
