TalenTeck is a human resource analytics company which builds products for all aspects of HR from sourcing applicants to scoring and identifying employees at risk of turnover. Our philosophy is that critical information, analytics, and technology are the keys to cost-effective matchmaking in labor markets.

We are a start-up based on the Upper West Side composed of Columbia University faculty, undergraduates, and recent graduates. We are looking for people to join our dynamic, passionate, start-up environment!

Description & Responsibilities
We are looking for individuals to assist with a variety of tasks in our fast paced work environment, some of which include:
- Market and industry research
- Writing and editing content for our website, presentations, and products
- Cleaning datasets and building statistical models using STATA and R
- Updating and maintaining our public webpage

What we are looking for:
- Quick learners who are self-motivated and work well independently
- Strong writing skills are a must
- Good organizational skills
- Quantitative work in economics, mathematics, and/or statistics
- Interest in labor economics, behavioral economics, sociology, and/or psychology
- Experience working with Microsoft Excel
- Experience working with STATA, R, and/or HTML preferred, but not required

The positions is flexible and there is no set minimum hours, though we prefer individuals who can work at least 10 hours per week.

If interested in a position, please visit our website www.talenteck.com and send your resume to ellorine.carle@talenteck.com.
